

SAFETY DATA SHEET Synthetic Polymeric Off-Road Grease, NLGI #1

According to Appendix D, OSHA Hazard Communication Standard 29 CFR §1910.1200 and WHMIS 2015, in compliance with the Hazardous Product Act (HPA, as amended) and the requirements of the Hazardous Product Regulations (HPR).

1. Identification			
Product identifier			
Product name	Synthetic Polymeric Off-Road Grease, NLGI #1		
Product number	GPOR1		
Recommended use of the che	Recommended use of the chemical and restrictions on use		
Application	Lubricating grease.		
Uses advised against	No specific uses advised against are identified.		
Details of the supplier of the sa	afety data sheet		
Supplier	AMSOIL INC. Bordner, Ladner, Gervais Scotia Plaza, 40 King St W Toronto, ON, Canada M5H 3Y4 T: +1 416-367-6547		
Manufacturer	AMSOIL INC. One AMSOIL Center, Superior, WI 54880, USA. T: +1 715-392-7101		
Emergency telephone number			
Emergency telephone	CHEMTREC: Within USA and Canada: 1-800-424-9300 Outside the USA and Canada: +1 703-741-5970 (collect calls accepted) 24/7		
2. Hazard(s) identification			
Classification of the substance	e or mixture		
OSHA/WHMIS Regulatory Status	This Product is Hazardous under the OSHA Hazard Communication Standard and according to the hazard criteria of the Hazardous Product Regulations.		
Physical hazards	Not Classified		
Health hazards	Eye Irrit. 2A - H319		
Environmental hazards	Not Classified		
Label elements Pictogram			
Signal word	Warning		
Hazard statements	H319 Causes serious eye irritation.		

Precautionary statements	 P264 Wash contaminated skin thoroughly after handling. P280 Wear protective gloves/ protective clothing/ eye protection/ face protection. P305+P351+P338 If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P337+P313 If eye irritation persists: Get medical advice/ attention.
Supplemental label information	AT(d) 27.5% of the mixture consists of ingredient(s) of unknown acute dermal toxicity. AT(i) 27.5% of the mixture consists of ingredient(s) of unknown acute inhalation toxicity. AT(o) 27.5% of the mixture consists of ingredient(s) of unknown acute oral toxicity.

Other hazards

This product does not contain any substances classified as PBT or vPvB.

3. Composition/information on ingredients Mixtures Diboron calcium tetraoxide 1 - <5% CAS number: 13701-64-9 Classification Skin Irrit. 2 - H315 Eye Irrit. 2A - H319 STOT SE 3 - H335 Calcium dodecylbenzenesulphonate 1 - <5% CAS number: 26264-06-2 Classification Acute Tox. 4 - H302 Skin Irrit. 2 - H315 Eye Dam. 1 - H318 Aquatic Chronic 4 - H413 Ethylbenzene <0.1% CAS number: 100-41-4 Classification Flam. Liq. 2 - H225 Acute Tox. 4 - H332 STOT RE 2 - H373 Asp. Tox. 1 - H304 Aquatic Chronic 3 - H412

Dibutyl phthalate <	<1%	
CAS number: 84-74-2		
M factor (Acute) = 1		
Classification Repr. 1B - H360Df		
Aquatic Acute 1 - H400		

The full text for all hazard statements is displayed in Section 16.

Composition comments The exact percentage is withheld as a trade secret in accordance with 29 CFR 1910.1200. 4. First-aid measures Description of first aid measures General information Get medical attention immediately. Show this Safety Data Sheet to the medical personnel. Inhalation Remove affected person from source of contamination. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as collar, tie or belt. When breathing is difficult, properly trained personnel may assist affected person by administering oxygen. Place unconscious person on their side in the recovery position and ensure breathing can take place. Ingestion Rinse mouth thoroughly with water. Give a few small glasses of water or milk to drink. Stop if the affected person feels sick as vomiting may be dangerous. Do not induce vomiting unless under the direction of medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Place unconscious person on their side in the recovery position and ensure breathing can take place. Maintain an open airway. Loosen tight clothing such as collar, tie or belt. Skin Contact Remove contamination with soap and water or recognized skin cleansing agent. Get medical attention if symptoms are severe or persist after washing. Eye contact Rinse immediately with plenty of water. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 20 minutes. Protection of first aiders First aid personnel should wear appropriate protective equipment during any rescue. If it is suspected that volatile contaminants are still present around the affected person, first aid personnel should wear an appropriate respirator or self-contained breathing apparatus. Wash contaminated clothing thoroughly with water before removing it from the affected person, or wear gloves. It may be dangerous for first aid personnel to carry out mouth-to-mouth resuscitation. Most important symptoms and effects, both acute and delayed General information See Section 11 for additional information on health hazards. The severity of the symptoms described will vary dependent on the concentration and the length of exposure. Inhalation Overexposure may cause the following adverse effects: Irritation of nose, throat and airway. Ingestion May cause discomfort if swallowed. Nausea, vomiting. Skin contact Prolonged skin contact may cause temporary irritation. Eye contact A single exposure may cause the following adverse effects: Redness. Irritation. Indication of immediate medical attention and special treatment needed Notes for the doctor Treat symptomatically. 5. Fire-fighting measures Extinguishing media Suitable extinguishing media The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire. Unsuitable extinguishing Do not use water jet as an extinguisher, as this will spread the fire. media

Specific hazards Containers can burst violently or explode when heated, due to excessive pressure build-up. Contains Hydrocarbons. The product is immiscible with water and will spread on the water surface. Hazardous combustion Hydrocarbons. Carbon monoxide (CO). Carbon dioxide (CO2). products Advice for firefighters Protective actions during Avoid breathing fire gases or vapors. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers firefighting exposed to flames with water until well after the fire is out. If a leak or spill has not ignited, use water spray to disperse vapors and protect men stopping the leak. Control run-off water by containing and keeping it out of sewers and watercourses. If risk of water pollution occurs, notify appropriate authorities. Special protective equipment Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective for firefighters clothing. Standard Firefighter's clothing including helmets, protective boots and gloves, that provides a basic level of protection during chemical incidents is defined by the Canada Occupational Health and Safety Regulations, by provincial guidelines on occupational health and safety or by NFPA standards if applicable. 6. Accidental release measures Personal precautions, protective equipment and emergency procedures No action shall be taken without appropriate training or involving any personal risk. Keep Personal precautions unnecessary and unprotected personnel away from the spillage. Wear protective clothing as described in Section 8 of this safety data sheet. Follow precautions for safe handling described in this safety data sheet. Wash thoroughly after dealing with a spillage. Do not touch or walk into spilled material. Avoid contact with skin and eyes. Use protective equipment appropriate for surrounding materials. **Environmental precautions** Immiscible with water. Aquatic toxicity is unlikely to occur. However, large or frequent spills Environmental precautions may have hazardous effects on the environment. Absorb spillage with non-combustible, absorbent material. Large Spillages: Inform the relevant authorities if environmental pollution occurs (sewers, waterways, soil or air). Methods and material for containment and cleaning up Methods for cleaning up Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately and dispose of waste safely. Small Spillages: Collect and place in suitable waste disposal containers and seal securely. Large Spillages: Collect spillage with a shovel and broom, or similar and reuse, if possible. Place waste in labeled, sealed containers. Clean contaminated objects and areas thoroughly, observing environmental regulations. The contaminated absorbent may pose the same hazard as the spilled material. Flush contaminated area with plenty of water. Wash thoroughly after dealing with a spillage. Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority. Reference to other sections For personal protection, see Section 8. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. For waste disposal, see Section 13. 7. Handling and storage

Special hazards arising from the substance or mixture

Precautions for safe handling

Usage precautions	Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs. Handle all packages and containers carefully to minimize spills. Keep container tightly sealed when not in use. Do not handle until all safety precautions have been read and understood. Do not handle broken packages without protective equipment. Do not reuse empty containers.
Advice on general occupational hygiene	Wash promptly if skin becomes contaminated. Take off contaminated clothing and wash before reuse. Wash contaminated clothing before reuse. Do not eat, drink or smoke when using this product. Wash at the end of each work shift and before eating, smoking and using the toilet. Change work clothing daily before leaving workplace.
Conditions for safe storage, in	cluding any incompatibilities
Storage precautions	Store away from incompatible materials (see Section 10). Store in accordance with local regulations. Keep only in the original container. Keep container tightly closed, in a cool, well ventilated place. Keep containers upright. Protect containers from damage.
Storage class	Chemical storage.
Specific end uses(s)	
Specific end use(s)	The identified uses for this product are detailed in Section 1.
8. Exposure Controls/persona	I protection
8. Exposure Controls/personal protection Control parameters Occupational exposure limits Ethylbenzene Long-term exposure limit (8-hour TWA): OSHA 100 ppm 435 mg/m³ Long-term exposure limit (8-hour TWA): ACGIH 20 ppm 87 mg/m³ A3 Dibutyl phthalate Long-term exposure limit (8-hour TWA): OSHA 5 mg/m³ Long-term exposure limit (8-hour TWA): OSHA 5 mg/m³ Cong-term exposure limit (8-hour TWA): ACGIH 5 mg/m³ Comparison of the american Conference of Governmental Industrial Hygienists. A3 = Confirmed Animal Carcinogen with Unknown Relevance to Humans. Ethylbenzene (CAS: 100-41-4) Immediate danger to life 800 ppm and health 800 ppm	
	Dibutyl phthalate (CAS: 84-74-2)
Immediate dang and health	er to life 4000 mg/m³
Exposure controls	
Appropriate engineering controls	Provide adequate ventilation. Personal protective equipment should only be used if worker exposure cannot be controlled adequately by the engineering control measures. Ensure control measures are regularly inspected and maintained. Ensure operatives are trained to minimize exposure.

Eye/face protection	Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment for eye and face protection should comply with OSHA 1910.133 and/or the Canadian regulation on health and safety at work, SOR/86-304, Part XII (12.6), and any relevant provincial regulation relating to health and safety at work. Unless the assessment indicates a higher degree of protection is required, the following protection should be worn: Tight-fitting safety glasses.
Hand protection	Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. To protect hands from chemicals, gloves should comply with OSHA 1910.138 and/or the Canadian regulation on health and safety at work, SOR/86-304, Part XII (12.9), and be demonstrated to be impervious to the chemical and resist degradation. Considering the data specified by the glove manufacturer, check during use that the gloves are retaining their protective properties and change them as soon as any deterioration is detected. Frequent changes are recommended.
Other skin and body protection	Appropriate footwear and additional protective clothing complying with an approved standard should be worn if a risk assessment indicates skin contamination is possible.
Hygiene measures	Provide eyewash station and safety shower. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse. Clean equipment and the work area every day. Good personal hygiene procedures should be implemented. Wash at the end of each work shift and before eating, smoking and using the toilet. When using do not eat, drink or smoke. Preventive industrial medical examinations should be carried out. Warn cleaning personnel of any hazardous properties of the product.
Respiratory protection	If ventilation is inadequate, suitable respiratory protection must be worn. Ensure all respiratory protective equipment is suitable for its intended use and is NIOSH approved. Check that the respirator fits tightly and the filter is changed regularly.
Environmental exposure controls	Keep container tightly sealed when not in use.

9. Physical and Chemical Properties

Information on basic physical and chemical properties		
Appearance	Grease.	
Color	Grey.	
Odor	Mild hydrocarbon.	
Odor threshold	Not available.	
рН	Not available.	
Melting point	Not available.	
Initial boiling point and range	Not available.	
Flash point	Not available.	
Evaporation rate	Not available.	
Upper/lower flammability or explosive limits	Not available.	
Vapor pressure	Not available.	
Vapor density	Not available.	
Relative density	0.97	

Solubility(ies)	Insoluble in water.	
Partition coefficient	cient Not available.	
Auto-ignition temperature	Not available.	
Decomposition Temperature Not available.		
Viscosity	Kinematic viscosity > 20.5 mm²/s.	
Explosive properties	Not considered to be explosive.	
Oxidizing properties	Does not meet the criteria for classification as oxidizing.	
Other information	No information required.	
10. Stability and reactivity		
Reactivity	See the other subsections of this section for further details.	
Stability	Stable at normal ambient temperatures and when used as recommended. Stable under the prescribed storage conditions.	
Possibility of hazardous reactions	No potentially hazardous reactions known.	
Conditions to avoid	There are no known conditions that are likely to result in a hazardous situation.	
Materials to avoid	Oxidizing agents. Acids - oxidizing.	
Hazardous decomposition products	Does not decompose when used and stored as recommended. Thermal decomposition or combustion products may include the following substances: Harmful gases or vapors.	
-		
products	combustion products may include the following substances: Harmful gases or vapors.	
products 11. Toxicological information Information on toxicological eff Acute toxicity - oral	combustion products may include the following substances: Harmful gases or vapors.

Genotoxicity - in vitro	Based on available data the classification criteria are not met.	
Carcinogenicity		
Carcinogenicity	Based on available data the classification criteria are not met.	
IARC carcinogenicity	None of the ingredients are listed or exempt.	
Reproductive toxicity		
Reproductive toxicity - fertility	Based on available data the classification criteria are not met.	
Reproductive toxicity - development	Based on available data the classification criteria are not met.	
Specific target organ toxicity -	single exposure	
STOT - single exposure	Not classified as a specific target organ toxicant after a single exposure.	
Specific target organ toxicity -	repeated exposure	
STOT - repeated exposure	Not classified as a specific target organ toxicant after repeated exposure.	
Aspiration hazard		
Aspiration hazard	Based on available data the classification criteria are not met.	
General information	The severity of the symptoms described will vary dependent on the concentration and the length of exposure.	
Inhalation	Overexposure may cause the following adverse effects: Irritation of nose, throat and airway.	
Ingestion	May cause discomfort if swallowed. Nausea, vomiting.	
Skin Contact	May cause skin sensitization or allergic reactions in sensitive individuals. A single exposure may cause the following adverse effects: Redness. Irritation.	
Eye contact	A single exposure may cause the following adverse effects: Redness. Irritation.	
Route of exposure	Ingestion Inhalation Skin and/or eye contact	
Target Organs	No specific target organs known.	
Medical considerations	Skin disorders and allergies.	

Toxicological information on ingredients.

Calcium dodecylbenzenesulphonate

Acute toxicity - oral	
Acute toxicity oral (LD₅₀ mg/kg)	1,086.0
Species	Rat
Notes (oral LD₅₀)	REACH dossier information.
ATE oral (mg/kg)	1,086.0
Acute toxicity - dermal	
Notes (dermal LD50)	LD₅₀ > 2000 mg/kg, Dermal, Rabbit Read-across data.
Acute toxicity - inhalation	
Notes (inhalation LC50)	LC₅₀ 310 mg/m³, Inhalation, Rat REACH dossier information.
Skin corrosion/irritation	

Animal data	Dose: 0.5ml, 4 hours, Rabbit Erythema/eschar score: Moderate to severe erythema (3). Edema score: Slight oedema - edges of area well defined by definite raising (2). REACH dossier information. Irritating.	
Skin sensitization		
Skin sensitization	Guinea pig maximization test (GPMT) - Guinea pig: Not sensitizing. REACH dossier information.	
Germ cell mutagenicity		
Genotoxicity - in vitro	Gene mutation: Negative. REACH dossier information.	
Genotoxicity - in vivo	Chromosome aberration: Negative. REACH dossier information.	
Carcinogenicity		
Carcinogenicity	NOAEL 250 mg/kg/day, Oral, Rat REACH dossier information.	
Reproductive toxicity		
Reproductive toxicity - fertility	Fertility - NOAEL 400 mg/kg/day, Oral, Rat P REACH dossier information.	
Reproductive toxicity - development	Developmental toxicity: - NOAEL: 400 mg/kg/day, Oral, Rat REACH dossier information.	
Specific target organ toxicity - repeated exposure		

STOT - repeated exposure NOAEL 100 mg/kg/day, Oral, Rat REACH dossier information.

12. Ecological Information

Toxicity

Harmful to aquatic life with long lasting effects.

Ecological information on ingredients.

Calcium dodecylbenzenesulphonate

Acute aquatic toxicity	
Acute toxicity - fish	LC₅₀, 96 hours: 3.2 mg/l, Oncorhynchus mykiss (Rainbow trout) REACH dossier information.
Acute toxicity - aquatic invertebrates	EC₅₀, 48 hours: 2.5 mg/l, Daphnia magna REACH dossier information.
Acute toxicity - aquatic plants	EC₅₀, 72 hours: 65.4 mg/l, Pseudokirchneriella subcapitata REACH dossier information.

Persistence and degradability

Persistence and degradability The degradability of the product is not known.

Ecological information on ingredients.

Calcium dodecylbenzenesulphonate

Biodegradation	Water - Degradation > 75%: 11 days The substance is readily biodegradable.
Bioaccumulative potential	
Bio-Accumulative Potential	No data available on bioaccumulation.
Partition coefficient	Not available.

Ecological information on ingredients.		
Calcium dodecylbenzenesulphonate		
Bio-Accumulative	e Potential BCF: 36 - 119, REACH dossier information.	
Partition coefficie	nt log Pow: 1.96	
Mobility in soil		
Mobility	The product is insoluble in water.	
Ecological information on ingredients.		
Calcium dodecylbenzenesulphonate		
Adsorption/desorcefficient	rption Soil - Log Koc: 3.21 @ 20°C	
Other adverse effects		
Other adverse effects	None known.	
13. Disposal considerations		
Waste treatment methods		
General information	The generation of waste should be minimized or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements. When handling waste, the safety precautions applying to handling of the product should be considered. Care should be taken when handling emptied containers that have not been thoroughly cleaned or rinsed out. Empty containers or liners may retain some product residues and hence be potentially hazardous.	
Disposal methods	Do not empty into drains. Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste, residues, empty containers, discarded work clothes and contaminated cleaning materials should be collected in designated containers, labeled with their contents. Incineration or landfill should only be considered when recycling is not feasible.	
14. Transport information		
General	The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, DOT, TDG).	
UN Number		
Not applicable.		
UN proper shipping name		
Not applicable.		
Transport hazard class(es)		
Transport labels No transport warning sign required.		
Packing group		
Not applicable.
